COVID-19 Resource Guide

Should I get tested?

Most people do not need to be tested. Testing supplies are limited, and usually not necessary. If you feel ill or have a fever, contact your health care provider. They will evaluate you and tell you if you need to get tested. For everyone, a test is not necessary.

Unfortunately, there are some companies and people taking advantage of fear around the COVID-19 Pandemic through scams. Here are some things to keep your self safe.

Hang up on robocalls. Don't push any buttons, just hang up!

Ignore offers for COVID-19 Vaccines. There are no vaccines, pills, or other products that can cure COVID-19

Fact-check information. Unverified information can cause serious damage.

None of us are alone.

Your Mental Health is Important!

Social Distancing does not mean you have to stay home. You can go for walks, bike rides, jogs, and more. Just please try to avoid places where there are a lot of other people, unless essential. And keep a distance of at least six feet from other people.

Stay Safe and Stay Healthy

Wash Hands

For at least 20 seconds, especially after being in a public place, or blowing your nose/sneezing/coughing,

Distance

The CDC recommends Keeping a distance of at least 6 ft between people.

Clean and Disinfect

Frequently touched surfaces such as tables, doorknobs, light switches, desks, etc.

Connect

Call, text, and even write letters to friends and loved ones. Distance does not mean isolation.

Eat and Exercise

Proper eating, exercising, and sleep are all part of staying healthy.
